Re: Patent Application Control Number 10/825,166

Dear Sir:

You sent me a lot to digest! Here are the results of my efforts:

I will try to work thru your report in as orderly a fashion as I can starting with your recommended changes to the "Abstract", followed by a discussion of the "Relative Patents", a "Description of the Preferred Embodiments" and a rewrite of the "Claims" with a response to your criticisms. In accordance with your suggestions the "Objects and Advantages" section is eliminated and the "Discussion" section has been replaced with "Description of Preferred Embodiments".

There have been no changes in the first three pages of the application, therefore these pages are not included in this submission. Pages 4 on have been changed and are included in their formal changed format. I trust this is what you need. I will send this to you by fax and then post the total revised patent application

  
Warren Grosjean

There are 13 pages attached. They are:

- Abstract of the disclosure
- Discussion of the prior art made of record
- Brief description of the drawings
- Description of preferred embodiments
- Claims
- Changes made to original claims
- Reasons for changes in claims
- Discussion of the claim revisions and examiner's critiques
